OCPP 1.6 Subset Certificate

Certificate holder: EGTRONICS Co., Ltd

Certificate number: OCA.0016.0764.CS

Product type: Charging Station

Product designation: EGMI205001

OCPP Software version: EGTN00001 Hardware feature set as stated below

Certification date: May 9, 2024

This certificate attests that the above mentioned product successfully completed certification testing in conformance with the reference specification OCPP 1.6 – Edition 2 with OCPP 1.6 Errata sheet (v4.0 Release, 2019-10-23). The optional features of the protocol covered by this certificate can be found in the abstract of this certificate.

Test cases have been performed as described in the test report referred to below. The results and remarks can be found in the complete test report.

Applied tests	Performed by / on	Document evidence
Conformance testing according to the test specification referenced by the test report	Korea Smart Grid Association, May 9, 2024	(KSGA)EGTRONICS_Test Report_EGMI205001_v1.5

The abstract of test report in the Annex is an integral part of this certificate. This certificate is valid from the Certification Date specified above. This certificate is only applicable to the product designation described above and permits the use of the OCPP logo as laid down in the OCA certification logo license agreement on this product only.

This certificate shall neither be tendered nor accepted by any party as a guarantee covering quality of a product which includes OCPP. The Open Charge Alliance, and/or its agents, including, inter-alia, test laboratories, disclaim liability for any damages or losses incurred by the certified company or by any other party resulting from reliance on the results of OCPP certification testing.

For the Open Charge Alliance:

ONOPH CARON

Abstract of test report

Test Result Summary

Test Report OCPP 1.6 Certification			
Test laboratory:	Korea Smart Grid Association		
Location:	Seoul, Korea		
Test execution location: EGTRONICS Co., Ltd (Seoul, Korea)			
Test Report Reference: KSGA-OCPP1.6TEST-065-2024			
Vendor name:	EGTRONICS Co., Ltd		
Device Under Test:	Charging Station		
Communication:	JSON		
OCPP Software version: EGTN00001			
Product designation:	EGMI205001		

Test Result Summary for the certified functionalities Functionalities OCPP 1.6 Description Certification Test Results Core Pass Basic Charging Station functionality for booting, authorization (incl. cache if available), configuration, transactions, remote control. Optional features Firmware Management N/A Support for (remote) firmware update management and diagnostic log file

Optional features				
Firmware Management	N/A	Support for (remote) firmware update management and diagnostic log file download.		
Smart Charging	N/A	Support for Smart Charging (all profile types, including stacking), to control charging.		
Reservation	N/A	Support for reservation of a connector of a Charging Station.		
Local Authorization List Managemen	N/A	Features to manage a local list in the charging station containing authorization data for whitelisting users.		
Remote Trigger	N/A	Support for remotely triggering messages that originate from a Charging Station. This can be used for resending messages or for getting the latest information from the Charging Station.		

Page 1 from 4

Performance Measurement Results

Name	PICS value	Measured value	Description
OCPP triggered function timeout:	30s	00:00:07	The response time for when waiting for an OCPP function with its corresponding request message. (Firmware update, Diagnostics and Reboot are excluded from this measurement.)
OCPP response timeout:	30s	00:00:29	The response time for when waiting for an OCPP response message.
Response time RemoteStartTransaction:	10s	00:00:00	The response time for the RemoteStartTransaction message.

Test Configuration

Vendor	EGTRONICS Co., Ltd
DUT / SUT	Charging Station
Communication	JSON
Туре	EGMI205001
OCPP Software version	EGTN00001
OCTT version	OCTT 1.6 v1.4.3

Hardware feature set			
Feature Configuration			
Socket(s) / connector(s)	Multiple		
Fixed cable	<yes></yes>		
Communication technology	Ethernet		
RFID readers	Single		

Non-OCPP Charge Point Configuration		
Configuration key		Value
<>		<>

All other relevant limits and non-OCPP settings that are relevant for the test laboratory and for the correct functioning of the CSMS:
