Meer details Inzichten

No, all my testpartners showed	23
Yes, I experienced one no-show	16
Yes, I experienced multiple no-s...	5

Online and onsite Plugfest feedback

What did you enjoy the most about the Plugfest (onsite)?

- Gathering technical knowledge on EV charging in one place
- Good presentations on the current state of OCPP and the near future
- Interacting with other companies and test our solution with different providers
- High quality of implementation

Plugfest take aways

- New contacts, better confidence in OCPP implementation
- Bugs and interesting use cases
- That OCPP is obligated in multiple continents, which is great news
- How many people from different organizations and different roles are working with OCPP in North America
- We find out about an open source CSMS for ocpp2.0.1

Plugfest recommendations

- I suggest that it needs to classify the participnant's implementation Level because of the expansion of OCPP.
- Have a good side-program to attract not only the engineers, but also the management.
- Maybe incentivate some more networking in between. Make it possible to match and meet the right people.
- Slack is ok, as platform. But there is no inbuilt video-chat feature we can use, because it was limited to two participants.
